

Bachelor or Master thesis

You are:

- Bachelor or Master student looking for a thesis position
- Ideally already with some experience in one or more of these fields:
 - practical lab work
 - instrumental analytics
 - PID control

Your tasks:

- planning processes
- building miniplants
- conducting experiments

Your reward:

- fun work environment inside a young, international research group
- HiWi contract with monthly salary during your thesis (usually 6 months, can be divided into several projects for your curriculum)

Interested?

Please drop an email with your CV at:

You will be invited to a tour around the campus as well as presented with the latest thesis topics available in the group for you to choose from.

Looking forward to your application!
