

SURFACE. GO DEEP.

Material builds experience. We design that layer.

Škoda Design is opening its CMF studio to interns and graduation projects.
We are looking for designers who think in materials.
Industrial, product, graphic, digital or interdisciplinary.
What matters is how you think about material, surface, structure and experience.

DIGITAL MATERIAL SYSTEMS

How can digital experimentation create material that would not exist otherwise and how can it then be translated into reality?

MATERIAL & TECHNICAL DIALOGUE

How can material change the architecture of a component, not just its surface, but as the starting point of a truly material-driven design?

EXPERIENCE THROUGH SURFACE

Can material shape emotion and perception, not just appearance?

These are starting points, not limits. We welcome your own proposals.

Internship: 4–6 months
Graduation project: 6 months

Full-time
Compensation: 20,000–27,000 CZK per month (approx. 900–1,100 EUR)

Based in Central Europe, with Prague close by.
Accommodation available if needed.

Please send your portfolio and a short introduction to:
