Degree programmes
Bachelor’s degree programmes
Bachelor students learn to design, construct and evaluate the performance of the textile chain. They learn how to organise and coordinate processes of the textile production and application field, in addition to the textile and clothing industry, future employers can also be the production industry, the construction industry etc. After completing their course and receiving their degree, candidates are entitled to a Bachelor’s degree.

Textile and Clothing Technology (B.Sc.)
Fields of study:
Textile technology
with the areas of specialisation
Textile Management or Textile Technologies
Clothing technology
with the areas of specialisation
Clothing Management or Product Development

Textile and Clothing Management (B.Sc.)
Taught in English

Master’s degree programmes
Master students learn to think analytically and in a structured way and are able to approach complex questions in a scientific manner and are able to work in a team. The Bachelor’s degree programme in Textile and Clothing Technology provides a solid basis of Science degree. Graduates are entitled to a Master’s degree.

Textile Products (M.Sc.)
Fields of study:
Textiles
Clothing
Design

Management of Textile Trade and Technology (M.Sc.)
People of study: English
Textile Technology
Trade and Retail

Textile and Clothing Technology Dual (B.Sc.)
Dual engineering training (for field of study and areas of specialisation see Textile and Clothing Technology)

Philosophy
The faculty’s mandate is to equip students with excellent professional know-how with a practical orientation at all stages of the textile chain. “From the fibre to the final product” is our motto, meaning thinking and structuring from the raw fibre to the many different textile end products in the clothing trade, house and interior textiles as well as technical textiles and more. In addition to the use of technology, teamwork, problem-solving and management competences, interdisciplinarity as well as an international and transregional focus are an important performance dimension of the Hochschule Niederrhein.

Textile and Clothing Technology
With more than 14,000 students, the Hochschule Niederrhein is one of the largest universities of applied sciences in Germany. Prospective students can choose from a range of more than 80 Bachelor’s and Master’s degree programmes in ten faculties. The Hochschule Niederrhein, founded in 1971 with roots reaching back into the 1850s, regards itself as a partner of the region. Since its inception it has made significant contributions to supplying regional businesses with qualified specialists and researching innovative solutions for the companies. Faculty teaching and learning are closely tied to regional and transregional businesses as an important performance dimension of the Hochschule Niederrhein.
International projects/cooperation

International students

Many textile and clothing companies operate on a global scale. People from different countries and cultures work together almost everywhere. Anyone who wants to understand global markets and customers also needs to have worked in different cultures.

The Hochschule Niederrhein has international contacts and has been suited to the needs of a globalised world.

Programme of study of the graduates

- Graduates in textile and clothing at the Hochschule Niederrhein possess a broad range of skills that enable them to work in various branches of the textile and clothing industry and in other fields where technical textiles are used.
- They are highly qualified for companies that benefit from the advantages of the global market and the textile and clothing industry.
- Graduates are also suited for companies that benefit from the advantages of the global market and the textile and clothing industry.

Research

Institutes and Competence Centres

Research Institute for Textile and Clothing (FTB)

The Research Institute for Textile and Clothing (FTB) is a joint research institute of the Hochschule Niederrhein. It is a central service institution for the textile and clothing industry. The Research Institute for Textile and Clothing (FTB) provides the textile and clothing industry with independent research and development services.

Public Testing Institute

The Public Testing Institute is a neutral facility, this accredited institute of the Faculty of Textile and Clothing Technology (FTB) provides a comprehensive range of services for the textile and clothing industry. The Public Testing Institute is a member of the Centre of Competence (C2C) and the European Textile Testing Network (ETTN).

Centre CSR (sustainability/ethics)

Centre (eBusiness/eCommerce) and the EthNa Competence Centre

The Centre for Sustainable Development (Centre CSR) and the Centre for Electronic Business (Centre eBusiness/eCommerce) are jointly managed by the Hochschule Niederrhein. The Centre CSR is a competence centre for sustainable development in textiles and clothing. The Centre eBusiness/eCommerce is a competence centre for eBusiness and eCommerce.
