

Intern Development LAB (all, 80-100%), 6-12 months

Would you like to be part of our R&D team and be the driving force behind the MAMMUT Development Lab, working with designers and developers to create the products of tomorrow? Then you've come to the right place.

We are looking for an intern who loves to work holistically on versatile topics and go into depth. The bunch of topics will be: innovation methods & tools, researching, idea generation, prototyping, sewing, working with patents and standards, test specimen preparation, testing, analyzing testing data, doing technical sketches & documentation, presentations, support in workshop and event organization.

Your responsibilities

- Participation in various R&D projects for Apparel
Within this frame work: research & ideation (ideas, know-how, standards, patents, store checks...), creating technical sketches, mock-up development, prototype sewing, defining test procedures, preparation of test specimen, conducting tests, documentation & analyzation of test results, documentation & presentation of ideas & findings.
- Support in Lab maintenance
Within this frame work: various tasks to maintain the Lab with its machinery and materials as a great open space to develop prototypes for all Designers & Developers at Mammut
- Support in event organization
Within that frame work: support in organizing and conducting any event which might be organized by the Lab such as Open Lab Days etc.

Your profile

- MA or BA in Textile & Clothing Technology, either in progress or completed or in comparable degree programs such as: Design, Product Design, Material Sciences or Mechanical Engineering or an education as bespoke tailor or pattern maker
- Solid sewing & garment making skills (theoretically & practically); experiences in the manufacturing methods of functional clothing would be a plus
- Ability to generate solution-oriented ideas and to prepare them visually for a presentation to an audience
- Prototyping methods: Ability to use different approaches to develop garment solutions
- Knowledge in creating technical sketches in Illustrator
- Know how in textile testing against standards as well as in analyzing test results and preparing them for a presentation to an audience
- Curious, reliable, diligent and open personality with a holistic way of thinking
- Being able to combine strong creative skills with solid and precise scientific working methods

- Strong transparent communications skills in English, German would be desirable
- Strong knowledge in MS Office and Adobe Illustrator, experience with Figma and Survey tools like Google Forms, CAD Assyst and VStitcher are a plus
- Experience in working with typical machines used in the manufacture of outdoor clothing, such as laser cutters and seam sealing machines would be desirable
- Experience in working with typical test devices used for textile testing like Hydrostatic Head and Microscope would be desirable

Benefits of working at Mammut

- new ideas are being heard, and a dynamic and agile work environment provides fertile ground for their implementation
- modern employment conditions and a good pension fund solution are self-evident
- you are perfectly equipped for your next adventure thanks to great discounts
- your workday is well balanced thanks to the free sports program at Seon, access to the nearby climbing gym as well as the heavily frequented Barista coffee machine

Are you ready to become part of our rope team? Then we look forward to receiving your application via the following link:
